Contents of *Animal Feed Science and Technology*, Volume 110

VOL. 110 NOS. 1–4 **11 NOVEMBER 2003**

Publisher's note 1

Ruminants

Ruminal degradability and in vitro intestinal digestibility of sunflower meal and in vitro digestibility of olive by-products supplemented with urea or sunflower meal. Comparison between goats and sheep
E. Molina Alcaide, D.R. Yáñez Ruiz , A. Moumen and A.I. Martín García (Granada, Spain) . . 3

Identification of lucerne stem cell wall traits related to in vitro neutral detergent fibre digestibility
H.-J.G. Jung and J.F.S. Lamb (St. Paul, MN, USA). 17

Effects of copper source and concentration on copper status and immune function in growing and finishing steers
K.L. Dorton, T.E. Engle, D.W. Hamar, P.D. Siciliano and R.S. Yemm (Fort Collins, CO, USA). 31

Effect of PEG and olive cake feed blocks supply on feed intake, digestion, and health of goats given kermes oak (*Quercus coccifera* L.) foliage
H. Ben Salem (Ariana, Tunisia), I.B. Salem (Ariana, Tunisia and Sidi Thabet, Tunisia), A. Nefzaoui (Ariana, Tunisia) and M.S. Ben Saïd (Sidi Thabet, Tunisia) 45

Prediction of the digestibility of primary growth and regrowth grass silages from chemical composition, pepsin-cellulase solubility and indigestible cell wall content
J. Nousiainen (Valio, Finland), M. Rinne (Jokioinen, Finland), M. Hellämäki (Valio, Finland) and P. Huhtanen (Jokioinen, Finland). 61

Effects of oilseed meal and grain-urea supplements fed infrequently on digestion in sheep. 1. Low quality grass hay diets
R.M. Dixon, B.J. Hosking and A.R. Egan (Parkville, Australia) 75

Effects of oilseed meals and grain–urea supplements fed infrequently on digestion in sheep. 2. Cereal straw diets
R.M. Dixon, W. Karda, B.J. Hosking and A.R. Egan (Parkville, Australia) 95

The nutritive value of concentrate feedstuffs for ruminant animals. Part I: In situ ruminal degradability of dry matter and organic matter
V.B. Woods, F.P. O'Mara (Dublin, Ireland and Dunsany, Ireland) and A.P. Moloney (Dunsany, Ireland). 111

The nutritive value of concentrate feedstuffs for ruminant animals. Part II: In situ ruminal degradability of crude protein
V.B. Woods (Dublin, Ireland and Dunsany, Ireland), A.P. Moloney (Dunsany, Ireland) and F.P. O'Mara (Dublin, Ireland). 131

The nutritive value of concentrate feedstuffs for ruminant animals. Part III. Small intestinal digestibility as measured by in vitro or mobile bag techniques
V.B. Woods (Dublin, Ireland and Dunsany, Ireland), A.P. Moloney (Dunsany, Ireland), S. Calsamiglia (Bellaterra, Spain) and F.P. O'Mara (Dublin, Ireland) 145

doi:10.1016/S0377-8401(03)00269-4

Non–Ruminants

Carbon balances for in vitro digestion and fermentation of potential roughages for pregnant sows
P.M. Becker, A.H. van Gelder, P.G. van Wikselaar, A.W. Jongbloed and J.W. Cone (Lelystad, The Netherlands) 159

The effect of site of starch digestion on performance of broiler chickens
R.E. Weurding (Lelystad, The Netherlands, Eindhoven, The Netherlands and Wageningen, The Netherlands), H. Enting (Lelystad, The Netherlands) and M.W.A. Verstegen (Wageningen, The Netherlands) 175

Effects of inclusion with blue lupins (*Lupinus angustifolius*) in broiler diets and enzyme supplementation on production performance, digestibility and dietary AME content
S. Steenfeldt (Tjele, Denmark), E. González (Badajoz, Spain) and K.E. Bach Knudsen (Tjele, Denmark) 185

The effect of citric acid and microbial phytase on mineral utilization in broiler chicks
A. Brenes, A. Viveros, I. Arija, C. Centeno, M. Pizarro and C. Bravo (Madrid, Spain) 201
